- (b) by 4, if the land is in Zone No 1 (c1).

*original allotment* means an allotment in existence at the date on which *Hawkesbury Local Environmental Plan 1989 (Amendment No 126)* was gazetted.

Schedule 1

- 
- (b) at least 20% of the land is occupied by an endangered ecological community or is a regionally significant wetland, and
  - (c) the Council is satisfied that there will be a better environmental outcome from a lot averaging subdivision than would result without such a subdivision and that the long term survival of the endangered ecological community or regionally significant wetland will be enhanced, and
  - (d) any endangered ecological community will be contained within and managed on neighbourhood property under the provisions of the *Community Land Management Act 1989*, and
  - (e) any regionally significant wetland will be contained within and managed on neighbourhood property under the provisions of the *Community Land Management Act 1989* or on an allotment designed for large scale agriculture, and

- (5) Despite subclause (2), the Council may consent to a lot averaging subdivision of land within Zone No 1 (b) that creates allotments of not less than 1 hectare if the Council is satisfied that the subdivision will result in a regionally significant wetland being contained and managed within an allotment used for large scale agriculture.
  - (6) Consent must not be granted to a subdivision of land within Zone No 1 (a), 1 (b), 1 (c), 1 (c1), 7 (d) or 7 (d1) that creates an allotment (otherwise than for use for a public purpose) unless the Council is satisfied that there is an area of land above the 1-in-100 year flood level on the allotment that is:
    - (a) sufficient for the erection of a dwelling-house, and
    - (b) at natural surface level or at a level achieved by filling carried out with the consent of the Council.
  - (7) Consent must not be granted to the subdivision of land within Zone No 1 (d) otherwise than to effect a minor boundary adjustment of the boundary between allotments that does not create more allotments than the number before the adjustment was made.
